

In preparation for the commercial launch of the .BANK gTLD on May 14, 2015 (see www.ftld.com/timeline for more information), fTLD would like to remind the global banking community that domain names can only be registered from ICANN-accredited registrars that have been approved by fTLD. A list of fTLD-approved registrars is available on the fTLD website at www.ftld.com/approved-registrars.

As the exclusive Registry Operator of .BANK, fTLD advises the global banking community to check the credentials of any company representing itself to be directly or indirectly associated with .BANK. Should any member of the community have questions regarding the parties that are authorized to provide domain name registration services for .BANK, please contact fTLD directly at ftld@ftld.com.
